DAVID A. SCHOLAR

David A. Scholar & Associates, now DAS Construction, has served clients in Southern California since 1983. For over 30 years, our award-winning company has focused its expertise on Residential Remodels and Custom Homes.

Our objective for each project is to deliver high-quality workmanship, ensure cost-effective results, and consistently exceed client expectations.

We believe our clients are best served when we work as a cohesive team, collaboratively sharing information among architects, designers, contractors, and homeowners.

To achieve this, DAS employs the latest technology — an industry-wide platform called **BuildEffective.com** — to coordinate the work of all project participants in one cloud-based location.

BuildEffective.com

DAS has been recognized and awarded as a Premier Builder for Southern California, having received the coveted **Gold Nugget Award** for Design and Construction in recognition of the best renovated, restored or remodeled residential project, as well as the **Grow the Economy Award** from the Santa Ana Chamber of Commerce for his contributions in the revitalization of the Midtown area. DAS projects have been featured in *World Architecture*, *California Homes*, *Sunset*, *Sun Coast Architect/Builder*, *Unique Homes*, *Distinctive Homes*, and *Christie's Great Estates*.

RAVES

“

We are out-of-towners and needed a builder who could give our project time, attention, and TLC. David is honest, fair, hardworking, creative, meticulous, and a pleasure to work with. He built our home with the love and care he would his own, and it was completed on time and on budget.

-Terry and Bill Meurer

“

As a land developer and real estate investor I have dealings with contractors on a daily basis. I have never dealt with a contractor who gives so much attention to details. David has made my projects worry free and his prices have always been very fair.

-Robert J. Cristiano

“

The complex and distinctive design of our house demanded the expertise of a highly-qualified builder. We recommend David wholeheartedly for his professionalism, honesty, and for truly being on our side during the long process of construction.

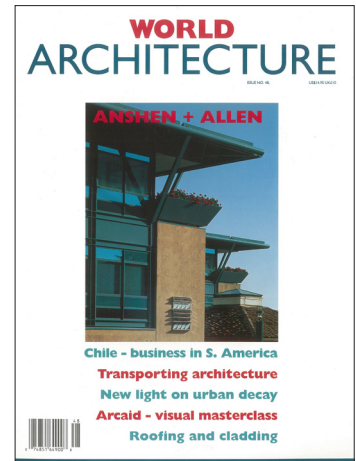

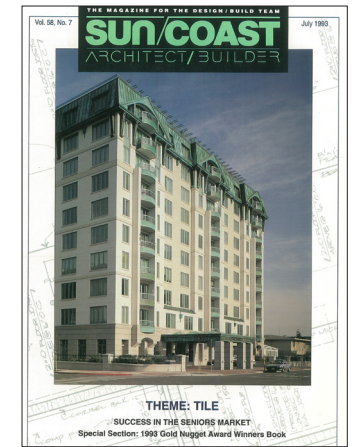

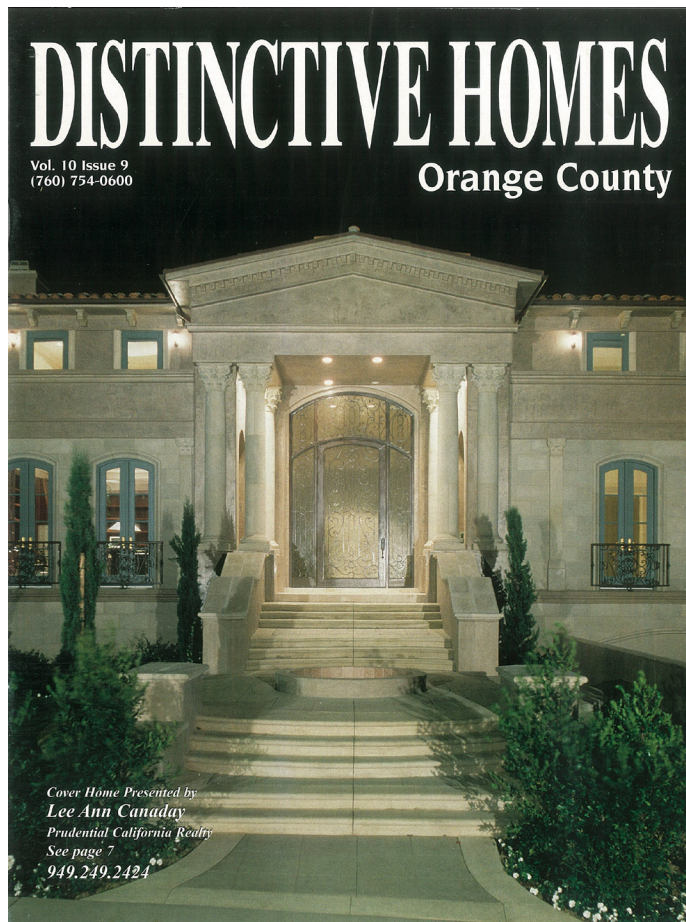

-Gene and Nora Meidinger

“

David's eye for detail and his personal concern in executing this project was greater than we could have ever hoped for. His competence and experience went a long way to simplifying our life and allowing us to focus on our business, while he concentrated on supplying our clients with their dream home.

-Jon Stillman, Bal Seal Engineering

FEATURED

WE DELIVER

high-quality workmanship with cost-effective results by working closely with owners, architects, designers, and engineers to transform their visions into beautifully-constructed residences.
